Drawings

The drawings are objected to because figures 23a, 23b,23c,23d, 23e,23f,23g, 23h,23i are not legible. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

Claims 15-21 are objected to because of the following informalities: In claim 15 line 1, "the sod harvester" lacks proper antecedent basis. In claim 15 line 3, the phrase "a wheel to chassis" is not understood. In claim 15 line 4, "the skid" lacks proper antecedent basis. In claim 16 lines 2-3, "the sod harvester" lacks proper antecedent basis. Appropriate correction is required.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 15-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Millar et al. (5,269,379).

Millar et al. discloses a sod harvester including a wheeled chassis, a robotic arm including a plurality of gripper modules 66, and a controller configured to control the robotic arm.

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Brouwer et al. (6,779,610).

Brouwer et al. discloses an apparatus for cutting and stacking rolls of sod including a wheeled chassis, a cutting mechanism, an accumulator, a sod roller, a conveyor, a robotic arm 42, a controller for controlling the robotic arm, and a retractable portion which allows an operator to return a rejected sod roll to the sod field.

Allowable Subject Matter

Claims 5-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
